

Prince Albert gives smokers such delight, because

—its flavor is so different and so delightfully good;
—it can't bite your tongue;
—it can't parch your throat;
—you can smoke it as long and as hard as you like without any comeback but real tobacco happens!

On the reverse side of every Prince Albert package you will read:

"PROCESS PATENTED JULY 30th, 1907"
That means to you a lot of tobacco enjoyment. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

PRINCE ALBERT

the national joy smoke

in goodness and in pipe satisfaction is all we or its enthusiastic friends ever claimed for it!

It answers every smoke desire you or any other man ever had! It is so cool and fragrant and appealing to your smokeappetite that you will get chummy with it in a mighty short time!

Will you invest 5c or 10c to prove out our say-so on the national joy smoke?

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

This is the reverse side of the Prince Albert tin. Read this "Patented Process" message to you and realize what it means in making Prince Albert so much to your liking.

HARVESTER COMPANY WAGE INCREASES SINCE 1902

During the recent labor disturbances which spread from various manufacturing establishments all over the country to the Chicago works of the International Harvester company, some interesting information was brought out concerning wage increases during the last fourteen years. At the very beginning of the disturbance in the Harvester plants, the management ordered a careful investigation of the wage increases to its employees since 1902, the year the company was organized. In order that this investigation might be fair, accurate, and impartial, the company went outside and engaged a firm of certified public accountants to make a detailed examination of the pay rolls from the year of the company's organization down to the present.

Without waiting for this report, the company proceeded at once to offer its employees in the McCormick and Deering works a new schedule, increasing the minimum rate to 25 cents an hour and granting a new rate which was equivalent to a wage increase of 11.4 per cent. This new schedule was applied to all employment, piece work or time.

Examination of the pay rolls by the certified accountants showed that the wages, even before the recent increase, were much higher than those in effect when the company was organized. The following certified report was made as to the McCormick and Deering works:

CERTIFICATE
We have made an investigation of the pay roll situation at the Deering and McCormick Harvester works of the International Harvester company of New Jersey, and

WE HEREBY CERTIFY, That the average hourly rate of wages of employees of these works (exclusive of superintendents and general foremen) during April, 1916, shows an increase of 50.34 per cent over the average hourly rate for the manufacturing season of 1902.

(Signed) HASKINS & SELLS, Certified Public Accountants.

This report shows an increase of more than one-half in the hourly rate of wages from 1902 down to April, 1916. When to that is added the increase granted in the new schedule effective May 1st, it makes the actual total increase of the hourly wage rate from 1902 to the present time 67.63 per cent—more than two-thirds.

A week later the same firm rendered another certified report covering the Deering and McCormick twine mills, as follows:

CERTIFICATE
We have made an investigation of the pay roll situation at the Deering and McCormick twine mills of the International Harvester company of New Jersey, and

WE HEREBY CERTIFY, That the average hourly rates of wages of employees of these mills (exclusive of superintendents) during April, 1916, show increases over the average hourly rates during the manufacturing season of 1902 as follows:

	Per Cent.
Male employees	58.59
Female employees	51.47
All employees	55.91

This comparison is on the day shift only; night workers are paid a premium of 10 per cent over day wages, which was not the practice in 1902.

(Signed) HASKINS & SELLS, Certified Public Accountants.
But there had also been a new schedule for the twine mills effective May 1, 1916. Adding the increase included therein to the figures of the certified accountants' report, the total increases in the twine mills from 1902 to date are:

	Per Cent.
Male workers	76.84
Female workers	68.58
Total	72.66

That means a total increase of the hourly wage rate in the twine mills from 1902 to date, of more than four-fifths.

The farmer has not felt the effect of these increases in wages for the simple reason that by improvements in the processes of manufacture and by the development of efficiency in the works the company has been able to offset the increasing cost of labor.

The recent rise in prices of farm machines was due solely to the abrupt and unusual increase in the cost of raw materials used in their manufacture. Material prices will doubtless go back to their former level in time, but wage increases may be regarded as permanent additions to the cost of production.

HE WOULD DUPLICATE
Ex-governor Cox when asked as to what his policy would be in case of his re-election to the gubernatorial chair of Ohio is reported to have answered:

"The chief objective will be to turn things around and let the state move forward, progressively as from 1913 to 1915."
This means another Latamier; Another giving away of the serum farm;

Another theft of a bill in the legislature;
Another attempt to steal a referendum petition for which the thief was sentenced to prison;
Another automatic assumption of the control of the taxing machinery by the restoration of the iniquitous Warnes law;

Another attack on the National Guard;
Another great increase in salary expense;
Another unnecessary million overhead expense;

Another law to force lobbyists to deal directly with the governor;
Another Cincinnati scandal;
Another crippling of the Smith One Per Cent law;

Another holding out of receipts from the state treasury;
Another rewarding of political service by double rentals;
Another invitation for levying tribute from civil service employees;

Another "rubber stamp" legislature;
Another letting of illegal road contracts for which his successor must pay;

Another lease on life for the loan sharks;
Another starving of state wards in an effort to make financial showing;
Another writing of "by and with the consent of the governor" into every statute which provides for the filling of an office, or the expenditure of public money.

In short, Mr. Cox promises to duplicate the administration for which he was so decisively repudiated.

No "New Models" in Mid-Season

THE Chandler Type 17 was a perfected car January 1st. It had back of it three years of refinement, three years of making good. There is no reason to change it or modify it or call it by some new name in mid-season.

Chandler Values are Permanent

The Chandler Type 17—thousands of them on the road today from coast to coast and giving the most satisfactory service—is distinctively the medium priced car of the year.

It's the car of a perfected motor, and the most beautiful body design. It is the car of greatest all around value and no marked up price. There is ample excuse for an advance in price, but it would not add to the value to increase the price.

We could not give more in this great car just by asking you to pay more.

CONTROLLING ROSE BUGS.

Rose bushes, grapevines, small fruit trees and other plants may be saved from attacks of the rose bug by proper means of protection. Poisonous sprays are ineffective in this case, according to entomologists at the Ohio Experiment Station. Valuable plants may be covered with mosquito netting for two to three weeks when the beetles are swarming, which occurs in late June or early July. Newly set grapes will be safe if enclosed in paper sacks.

For a large number of plants a practical device is an umbrella-shaped collector having a hole in the bottom. The beetles may be shaken from the vines into this cloth and will fall through the hole into a pail having kerosene on top of water. Jarring the vines three times daily for ten days to two weeks will insure a crop of grapes at slight expense.

The insect lays its eggs in the ground, usually in waste land, in late June or early July. When the young live on plant roots until winter, when they descend below the frost line. In the following May they come near the surface, and change to a form becoming the adult beetle. Flowing at this time will destroy great numbers.

Why Endure Summer Colds?

It isn't necessary to have a stuffed head, running nose. To cough your head off as it were. All you need do is to use Dr. Bell's Pine-Tar-Honey. The soothing and healing balsams open the clogged air passages and in a short time you get relief and start on the road to recovery. Your nose stops running, you cough less and you know you are getting better. Get a bottle, use as directed. Keep what is left as a cough and cold insurance.

PREVENTS CARBON TROUBLE IN MOTORS

An automobile attachment which can be put on any engine is designed entirely to prevent the accumulation of carbon in the cylinders. The device is described in the July Popular Mechanics Magazine. It consists of two parts; an aluminum container mounted on the exhaust manifold, and a bronze coil wound around the exhaust and leading to the intake manifold. The container is filled with water which the heat of the exhaust causes to boil in about 10 minutes, whereupon the steam is drawn off and sucked through the hot coil, the temperature of which makes it superheated steam. It then passes on and is shot into the mixture in the intake, raising the temperature of the gas as it mingles with it. By weight water has considerably more oxygen than air; the oxygen in the superheated steam combines with the carbon and forms carbon dioxide. Thus any deposits that may exist is burned up in the formation of carbon dioxide. The device also effects a considerable saving of fuel.

Should Sloan's Liniment Go Along.

Of course it should! For after a strenuous day when your muscles have been taxed to limit an application of Sloan's Liniment will take the soreness and stiffness away and get you in fine shape for the morrow. You should also use it for a sudden attack of toothache, stiff neck, backache, stings, bites and the many accidents that are incidental to a vacation. "We would as soon leave our baggage as Sloan's Liniment." Writes one vacationist: "We use it for everything from cramps to toothache." Put a bottle in your bag, be prepared and have no regrets.

LIQUID AIR IN MINING.

Liquid air has been used increasingly in Germany for blasting, since the outbreak of the war, and so satisfactory has it been found that doubtless it will be used even more after the war. One advantage that liquid air has over other explosives is the safety with which it can be handled. In blasting black model-like bags, which are called cartridges, are saturated with the liquid air and used as charges. Though one of the cartridges is more powerful than an ordinary charge of dynamite it can be tramped under foot without any danger, a hissing sound like escaping steam being the only noise produced. The miners take several of these cartridges and with a stick jam them into a hole that has been drilled into the rock. The charge is set off by means of electricity. According to German figures, the liquid air, under present methods of manufacture, costs about one-half as much as dynamite.—From the July Popular Mechanics Magazine.

THINNING OF FRUIT ADVISED.

By practicing a system of fruit thinning, R. B. Cruickshank, of the Agricultural College Extension Service, Ohio State University, points out that orchardists in Ohio can secure larger yields and consequently greater profits because of a better quality of fruit. Thinning relieves overcrowding, makes the fruit more uniform in size, helps to prevent the spread of brown rot and is also a means of destroying insect infestation and disease.

Two methods of thinning are followed: One by pruning the superfluous branches and the other by picking. Apples may be thinned when the size of hickory nuts to the distance of 4 or 5 inches.

(Copyrighted, 1914, by Thomas A. Sullivan.)
It is not victory that makes the joy of noble hearts, but the combat. The greater the obstacle the more glory in overcoming it, and difficulties are but the maids of honor to set off the virtue.

The effects of competition are wonderful. There are men who rise refreshed on hearing of a threat—men to whom a crisis which intimidates and paralyzes the majority comes graceful and beloved as a bride. Competition inflames the enthusiast and drives him on to action.

The Making of Men.

It is not ease, but effort; not facility, but difficulty, that makes men. There is perhaps no station in life in which difficulties have not been encountered and overcome before any decided measure of success was achieved. Recognizing the retail catalogue house as a worthy foe, a competitor, the local retail merchant, in preparing for battle must take an inventory of his many advantages over the mail order house.

First and foremost, he is always working among friends and acquaintances. The mail order house must always work as a stranger.

Did any one ever suggest to him before that perhaps he neglected or overlooked many things important to business success?

An Iowa Cure For Bad Habit.
I am not an adept at suggestions, so will refrain from making any, but will tell of a plan that worked out successfully in an Iowa town.

The merchants of that town were being imposed upon by mail order buyers and organized for their own protection and determined to cancel all favors and credit heretofore extended to those offending citizens.

It developed that the first applicant was a lady who had recently purchased a sewing machine from a catalogue house. Her daughter was about to be married, and she wished to present her with a parlor set as a present and, finding her husband short of ready money, asked credit from the local dealer.

The dealer politely declined, advising that he could not do so until the mail order house of Chicago from which she purchased her sewing machine would be most happy to extend to her the desired credit.

THE SULPHURIC ACID INDUSTRY PROSPEROUS

The production of sulphuric acid in the United States in 1915 was 3,808,152 short tons, expressed in terms of 50 degrees acid, valued at \$29,869,080, and there was an output of 189,795 short tons of oleum or fuming acid of different strengths, valued at \$2,787,971, making a total of 4,057,947 short tons, valued at \$32,657,051.

These figures, which are made public by the United States Geological Survey, and which were compiled by W. C. Phalen, include so-called by-product acid, or acid produced as a by-product in the production of acid of different strengths, valued at \$579,115.

The total production is an increase as compared with 1914, due to increase in the production of acid of stronger grades—60 degrees and higher. The output of by-product acid in 1915 also showed an increase as compared with 1914. Expressed in value, the products these increases have been large.

In preceding years the Survey has reduced the different strengths of acid, including the stronger grades, to 50 degrees Baume whenever sufficient data were available for this conversion. The manufacture of this stronger acid is becoming more important, owing to the demand from the explosive and war munitions industries, and in the statistics for 1915, for the first time, this acid is classified separately.

The price of sulphuric acid varied widely during 1915. Producers who had previously entered into long-term contracts sold at prices much below those now current, especially during the last part of the year. The trade in strong acids was active, on account of the demand from the explosives and war munitions industries, but this demand came only after the first quarter of the year and was very strong only during the last half of the year. Before that time some of the strong acids were sold at low prices which ruled on the market at the close of the year.

STATE CIVIL SERVICE COMMISSION

Prospective candidates for the position of either superintendent or matron of the Fulton County Infirmary have only until July 3 in which to have their applications on file with the State Civil Service Commission at Columbus. The examination will be held on July 8 at 9 a. m. at the court house in Wauseon, and all applications must be filed with the commission at least three days before. Just as soon after the examination as the papers can be graded the names of the eligibles will be certified to the county commissioners and the permanent appointment made. Application blanks and other information concerning these examinations, open only to residents of Fulton county, may be obtained by addressing the State Civil Service Commission at Columbus or from the County Auditor.

LEMON JUICE CLEANS ALUMINUM

Aluminum ware which has become coated can be cleaned by a weak solution of nitric acid (less than 1 per cent solution) vinegar or lemon juice. Nitric acid solution will remove spots and form a light coat of oxide of aluminum which will protect the ware against further deposits. Strong solution of acid such as muriatic should never be used as they will dissolve the metal. Ordinary laundry soap and all scouring and washing powders are dangerous to use. Care should be taken that alkaline substances such as soda and caustic soaps should not come in contact with aluminum.

NO OPPOSITION IN PRIMARIES.

Senator C. C. Cass of Ottawa will have no opposition at the Primary Election in August. Mr. Cass is a faithful and efficiently performed the duties of his office and has rendered important service to the state in his codification of the State Road laws, certainly Mr. Cass is entitled to a second term. The Democrats will have two candidates for the nomination to this office on their party ticket at the November Election: A. C. Ewing of Findlay, and Frank W. Thomas of Bowling Green, Editor of the Wood County Democrat.

THE PLEDGE OF THE FLAG.

Flag of our "Great Republic" hallowed by noble deeds and loving sacrifice. Guardian of our honor, an inspiration in every battle for right, whose stars and stripes stand for beauty, purity, truth, patriotism and the Union.

And for thy defense, the protection and help of our country and the conservation of the liberty of the American people, we pledge our hearts, our lives and our sacred honor.

Henry County Review.

Look Good—Feel Good

No one can either feel good nor look good while suffering from constipation. Get rid of that tired, draggy, lifeless feeling by a treatment of Dr. King's New Life Pills. Buy a box to-day, take one or two pills to-night. In the morning that stuffy, dull feeling is gone and you feel better at once. 25c at your druggist.

When you use your Columbia Gramophone to educate yourself in hearing the greatest artists and selections from grand opera and other great musical works you soon learn the value of this instrument. Mr. Geo. A. Heath will be glad to demonstrate his machines or sell you a fine piano at any time. 12-3-c

Do You Keep Your Money Busy?

Is your money lazy? Does it lie around month after month earning 4 or 5 per cent, or nothing at all, when it might be finding a safe and legitimate way to earn 7 or 8? You are quick enough to recognize the value of a man who is energetic and alert, and you know that he is worth three or four times as much as one who is lazy and indolent. But are you equally quick to appreciate the excellence of money that goes out into the world and keeps moving until it finds a safe berth where it can earn 7?

Do you know that one of the safest and most convenient ways for your money to earn 7 is to buy the kind of industrial preferred stock we have been selling for twelve years? Do you know that you can verify this fact through any bank or commercial agency in Stark County, where our principal office is located? If you do know these things and your funds continue to lie idle at 4 or 5 per cent, is there anyone but yourself to blame?

Perhaps you will say that you do not have time to make a study of investments. This is probably true. It is also true of more than 10,000 men and women, residing in thirty-five states, who have learned to rely on our recommendation in making their investments. During the past twelve years they have bought nearly \$20,000,000, par value, of preferred stocks from us without the loss of a dollar of principal or income.

If you have \$100 or more that should be put to work, send us your name and address today, as we will send you a booklet describing the 7% cumulative preferred stock of The Central Ohio Company. This booklet contains financial statements and other accurate information which we place at your service, without expense or obligation, as part of our service to those who have money to invest.
